PROFILE

Frontend Developer with 7+ years of experience crafting scalable web applications for US and international clients. Specialized in React, Next.js and TypeScript, with a strong focus on component architecture, automated testing and developer experience. Self-taught, product-minded, and driven by a learn-by-doing approach — I bring both technical depth and team collaboration skills to every project.

EXPERIENCE

Klimber

May 2025 – Present · Buenos Aires

Frontend Developer

- Building and maintaining product features using React, Next.js and TypeScript in an agile environment.
- Collaborating with design and product teams to deliver polished, accessible UI components.

GlobalLogic

Jul 2024 – May 2025 · 11 mo

Front End Developer

Client: American Consumer Financial Services Company

- Developed new product features and resolved critical bugs on a large-scale consumer finance platform using ReactJS and TypeScript.
- Contributed to technical decision-making within an international, cross-functional team.
- Authored comprehensive automated test suites with Cypress, Jest and React Testing Library to maintain code quality and prevent regressions.

Globant

Oct 2020 – Jul 2024 · 3 yr 10 mo

Front End Developer

- **AI Recommendations Tool:** Led frontend dev of a personalized engine + admin portal. Tech referent, synced with UX/Product. Stack: React, TS, MaterialUI, Jest, RTL.
- **Stock Dashboard (US Bank):** Real-time stocks UI, optimized rendering, cross-team alignment. Stack: React, TS, AgGrid, MaterialUI.
- **NFT Marketplace:** Full marketplace (mint, buy, sell, search) with Next.js, EthersJS, React Context, TypeScript.
- **B2B Marketplace:** White-label product searcher + backoffice (users, roles, shipping) with React, Redux, MaterialUI.

SOUTHWORKS

Apr 2018 – Sep 2020 · 2 yr 6 mo

Full Stack Developer

- Built a job postings site from scratch using React and Node.js, deployed on AWS S3 with CodeBuild CI/CD pipeline.
- Contributed to the Windows Community Toolkit — developed and upgraded UWP controls in .NET, coordinating with the open-source community.
- Maintained a live-streaming platform leveraging AWS Lambda, DynamoDB, API Gateway and Step Functions.
- Other projects: Docker image generation, e-commerce generator. Additional stack: VueJS, GatsbyJS, TypeScript, Bash.

Consisnet S.A.

Apr 2017 – Apr 2018 · 1 yr

Full Stack Developer

- Developed and maintained a merchandise management system with invoice recognition and role-based user management using SQL, JavaScript and .NET.
